

## Table Mount Kiosk for Lottery operations

Pushpam has developed a Transaction Kiosk for the Lottery industry, where they are using it for the online business. The machine is having 13" LCD TFT monitor with the touch screen and also a customer display to show the customer information of the transaction and mean time also to display the advertisements. It also has a barcode scanner built in for checking the winning tickets fast. The configuration of the machine includes a P4 CPU with the 512 MB RAM, 80 GB HDD and

standard ports. The most beauty of the machine is its connectors, space utilization and the user friendliness.

The standard machine includes all the ports like USB port, Serial Port, Parallel Port, Sound port, Network Port (RJ45), Modem Port (RJ11). All standard interfaces make it possible to have the complete expandability of the machine in all terms. Kiosk is connected to the internet with

the wireless connectivity and is also connected to a thermal receipt printer to print the tickets. If you need any more information on this product please contact.....
